

TERRAZZO

protected in airport terminal

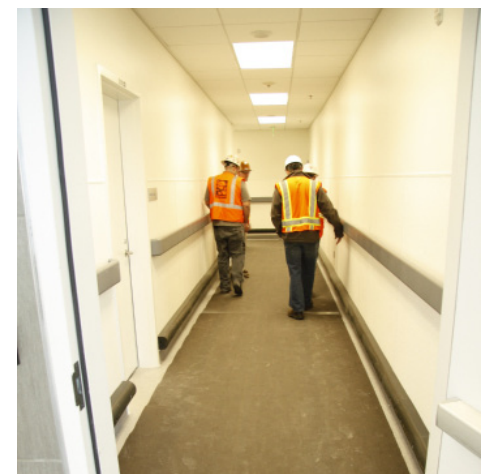

Project Details:

- McCarran International Airport - Terminal 3
- Las Vegas, NV
- McCarthy Building Companies
- Skudo HT Mat - 90,000 s.f.
- Terrazzo

Why Skudo Was Chosen:

- McCarthy was unhappy with traditional floor protection methods since they proved inconsistent, and as a result last minute repairs were needed at the end of the job.
- Skudo proved reliable, ultimately saving McCarthy time and the costs of clean up and repairs.
- Skudo was quick and easy to apply.
