

# Protecting polished concrete during retail store construction

## Project Details:

- Restoration Hardware store, Atlanta, GA
- Gilbane Building Co.
- Skudo LT Tack-Mat - 57,000 s.f.
- Skudo Commercial Mat System, HT - 5,000 s.f.
- Polished concrete
- 2014

## Project Scope:

In November 2014, well-known furniture and home décor retailer Restoration Hardware opened their largest store to date in the upscale Buckhead district of Atlanta, GA. The six-story, 70,000 s.f. RH Gallery was built to resemble a contemporary southern estate. The building features a 40-foot-tall entry rotunda with a double staircase, a three-story atrium, a 50-foot long reflecting pool, two acres of gardens and terraces, and a rooftop park and conservatory.

**Skudo's LT (Light Traffic) Tack-Mat and Commercial Mat System, HT (Heavy Traffic), protected polished concrete from dust, building materials, and equipment, revealing a clean and spotless surface for the Grand Opening.**

Newly opened Restoration Hardware retail store

LT Tack-Mat protects staging areas

Tack-Mat provides protection against dust and dropped materials

An area NOT covered with Skudo reveals stain and scratches
