

# FAQ'S

## Skudo Glass Advanced

### ***Q. What is Glass Advanced?***

A. Skudo Glass Advanced is a liquid application that dries as a protective film providing the perfect solution for all construction projects that require temporary window and glass protection from start to finish. Tough enough to withstand metal filings, welding sparks, cement/mortar, and paint splatter - Skudo® Glass Advanced will protect valuable glass and frames for up to 12 months.

### ***Q. How is Glass Advanced applied?***

A. Glass Advanced can be applied by either roller or airless sprayer. Skudo Glass Advanced cannot be applied if the temperature is below freezing or if rainfall is expected. If the surface is likely to be exposed to direct rainfall before the product has dried, do not apply. When required Glass Advanced is removed by hand peeling.

### ***Q. Does Skudo provide an installation service?***

A. No – Skudo does not install. Skudo does conduct onsite demonstrations. Skudo also provides access to a detailed installation training video on our website.

### ***Q. What other surfaces can Skudo Glass Advanced be applied to?***

A. Skudo Glass Advanced will also protect

- Metals like, Stainless Steel, and Aluminum
- Pressed metal bathtubs
- Low-e (low emissivity) glass

***\*Skudo Glass Advanced is not suitable for application over any “acrylic surface or coating”.***

### ***Q. Where can I buy Skudo Glass Advanced?***
