

Skudo®

Temporary Surface Protection

Skudo provides a revolutionary set of products for reliable temporary surface protection against construction site damages. Unlike loosely laid or taped down cardboard, plastic or wood products, nearly all of our products **temporarily adhere** to the surface they're protecting and **peel off to remove**, leaving your surface clean and free from damages.

Innovative, Purpose-Built Surface Protection Systems.

Save the headache, time and money of making repairs.

"By far, Skudo® is the most durable floor protection system on the market."

- Doug Carlton,
Concrete Décor Magazine

Heavy Traffic

Medium Traffic

Light Traffic

The most durable temporary surface protection available against:

- Machinery use
- Foot traffic
- Spills – including mortar, stucco, paint, oil
- Stains – including rust, chalk, hydraulic fluid
- Dirt, dust and debris
- Scaffolding and shoring
- Water
- Mold
- UV exposure
- Sparks and fire

"Skudo held up well! We had a couple of hydraulic leaks from one of the electric man lifts, resulting in a puddle of oil on the floor overnight. Skudo did not allow the oil to penetrate through."

- Project Manager
Neuser Construction

This Is All We Do.

Skudo has a protection solution for almost all surface types and work environments: most substrates, vertical or horizontal, indoors or outdoors, residential or commercial.

- Concrete
- Tile
- Hardwood
- Terrazzo
- Epoxy
- Stone & Marble
- Cabinets
- Countertops
- Stairs
- Bathtubs & Showers
- Columns & Pillars
- TPO Roofs
- Windows
- Metal Railings

Improves job site safety

- Non-slip work surface in both wet and dry conditions.
- Eliminates slip and trip hazards
- Stationary – stays in place despite worker activity and weather
- High visibility colors

Skudo Products

All Skudo products provide a temporary covering to protect finished surfaces from construction site damages, spills and stains.

Skudo Commercial System is a 2 part system consisting of a Base Coat and Mat, ideal for protecting substrates on large commercial jobs for up to 12 months. Most commonly used on concrete and terrazzo, Commercial System is available in both Heavy (HT) and Medium Traffic (MT) Grades. Commercial System provides superior protection from machinery, scaffolding, shoring, bacteria, molds, spills, slips, and more. The HT grade is also approved for exterior use and is Class 1 Fire/Flame retardant.

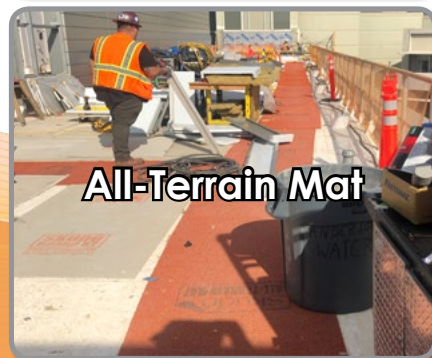

Skudo Tack-Mat is a self-adhesive mat – simply peel the backing paper and apply to the surface to be protected. Tack-Mat can be used on a wide variety of horizontal and vertical surface types, such as tile, marble, hardwood, ceramic, vinyl, and laminate. Tack-Mat is available in Heavy Traffic (HT), Light Traffic (LT), and High Impact (HI) grades. The HT grade is also Class 1 Fire/Flame retardant. (Recommended for interior use only.)

Skudo Glass Advanced is a liquid coating that is rolled or sprayed onto glass or metal

surfaces which then dries into a protective film. In addition to resisting job site spills and splatter, it is also fire resistant to withstand welding and grinding sparks. Glass Advanced can be left in place for up to 12 months and is removed by simply peeling upon completion.

Skudo All-Terrain Mat provides a safe traffic zone over unprepared and uneven surfaces for construction workers, contractors, and clients. All-Terrain Mat can be placed over surfaces such as gravel, sand, rocks, mud, snow, and ice. It is applied by simply rolling out the mat and pegging down as needed.

SkudoBoard is a heavy duty, rigid board that provides superior protection under forklift and heavy duty construction traffic. Unlike masonite or plywood, SkudoBoard will not curl or warp. In addition to the standard version, SkudoBoard is also available in Fabric Back, Interlock, and **Column Guard** depending on your project needs.

How to Contact Skudo

Wondering which Skudo product is perfect for your project?

Want an onsite demo? Need to know how to purchase Skudo in your area? Contact Skudo today!
