

Tile undamaged after fire

Project Details:

- Top of the Mark - Gold Coast Holiday Apartments
- Brisbane, Australia
- Skudo HT Mat - 43,000 s.f.
- Porcelain and Granite Tiles

Remarkable Performance

After an electrical fire tore through a Brisbane apartment complex, the newly laid tile beneath Skudo HT Mat was unscathed. Smoke damage destroyed unprotected tile in other areas of the building.

The Air Conditioning disseminated thick toxic smoke from the fire's source, the main circuit board, to the bottom 4 floors of the complex. Queensland Fire and Rescue Service area commander Todd Murray said the fire, which took more than four hours to extinguish, was difficult to contain.

Typically, smoke and water from exterminating the blaze cause the entire floor to require replacement. With Skudo on the job, it's estimated that \$15,000 were saved in product replacement cost and labor.

Tile protected with Skudo HT Mat is undamaged

Unprotected tile required replacement after fire and smoke damage
