

# Protecting concrete for a new school

## Project Details:

- Poway Unified School District, Poway, CA
- Bighorn Construction
- Skudo Commercial System, HT Mat - 64,000 s.f.
- Concrete (later polished)
- 2014

## Project Scope:

In August 2014, the Poway Unified School District opened the doors of their brand-new campus in Poway, CA for Kindergarten - 8th Grade students. The \$56 million construction project took a total of 17 months to complete. The first school of its kind, the new facility has open-concept, non-traditional classrooms designed for up to 1,500 students to learn through critical thinking, empathy, creativity, and rationality.

**Skudo's Commercial System, HT  
(Heavy Traffic) protected concrete  
from construction materials, stains,  
machinery and heat, for over a year.**

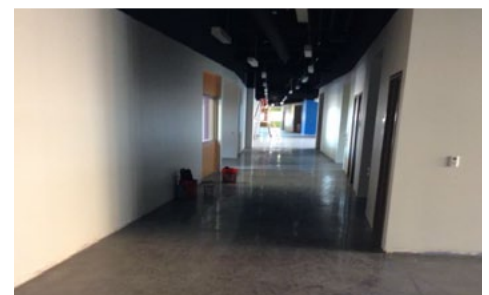

K-8 School, Poway, CA

Protection from sparks, heat, machinery, and materials

Upholding protection after 12 months down

"Skudo protected the concrete from staining."
