

# FAQ'S

## SkudoBoard HT

### ***Q. What is SkudoBoard HT?***

A. SkudoBoard HT is an engineered heavy duty, synthetic, lightweight rigid board that delivers superior protection from machinery like forklifts, material carts and general construction traffic inside or outside, fully exposed to the elements. SkudoBoard HT is also available in a Fabric Backed version ideal for protecting more damage sensitive surfaces.

### ***Q. What size sheets are available?***

A. SkudoBoard HT Standard and Fabric Back are available in 8 x 4 sheets, HT FR Fabric Back is also available in an Interlocking 45"x45" sheet.

### ***Q. Why SkudoBoard HT and not Plywood, Masonite or other synthetic boards?***

A. Unlike most other alternatives, SkudoBoard HT is lightweight, slip resistant, fire retardant and water resistant. SkudoBoard HT resists curling and warping, further reducing safety hazards on the job site. SkudoBoard HT is easy to cut with a box knife, and in most cases due to ease of cleaning can be reused.

### ***Q How is SkudoBoard HT installed?***

A. Simply place and secure using 2-inch Gorilla Tape or similar. Installing 8x4 sheets offset (brick bond) can improve the stability, particularly where forklifts and other machinery are regularly used. SkudoBoard HT Interlock (45"x45") has interlocking tabs that hold the board securely in place minimizing the need for taping. SkudoBoard HT Interlock (45"x45") is quick and easy to handle in tight situations like narrow corridors.

### ***Q. Where can I buy SkudoBoard HT?***

A. Visit our website at [www.skudousa.com](http://www.skudousa.com) select the "where to buy tab" then click on your location on the map.
